SUMMARY

AI/ML Engineer with hands-on experience building end-to-end machine learning systems, from model training and evaluation to API deployment. Strong foundation in deep learning, NLP and RAG, and explainable AI, with backend engineering skills that turn models into working products.

PROFESSIONAL EXPERIENCE

NEXTAR Quantum Systems

Feb 2026 – Present

Research Analyst

Abuja, NG

- Engineered optimized data pipelines in Python and SQL for the collection, cleaning, and processing of structured and unstructured data to support research and decision-making
- Compiled research findings into reports and briefs, providing data-driven insights for ongoing projects
- Collaborated with researchers and academics to maintain high research standards across data collection, analysis, and documentation

PROJECTS

Plant Disease Detection System

ML Engineer / Backend Developer

- Built a full ML pipeline classifying plant diseases with an EfficientNet-B0 model trained on the PlantVillage dataset, served via FastAPI with ONNX for lightweight, fast inference
- Designed a two-gate pipeline combining a pretrained MobileNetV2 model for plant-subject gating with a confidence threshold to reject out-of-distribution inputs
- Deployed on Render free tier for accessible, low-cost hosting

Chest X-Ray Pneumonia Classification

ML Engineer

- Developed a CNN in TensorFlow and Keras to classify chest X-rays as Normal or Pneumonia, using data augmentation and prioritizing recall for the medical use case
- Applied Grad-CAM to visualize the image regions influencing predictions, adding explainability for clinical interpretation

AI-Powered RAG Assistant (Fintech)

ML / Backend Engineer

- Built a fintech-focused conversational assistant using Retrieval-Augmented Generation, with ChromaDB and sentence-transformers for retrieval and Groq as the LLM provider
- Developed the FastAPI backend and a React (Vite) frontend, validating assistant responses against a synthetic test dataset

Sentiment Analysis on Text Reviews

ML Engineer

- Built an NLP model using TF-IDF and machine learning classifiers to categorize reviews as positive, negative, or neutral, handling preprocessing and class imbalance
- Selected the best-performing model based on F1 score

EDUCATION

Veritas University Abuja

September 2022 – June 2026

B.Sc. Computer Science

Abuja, NG

CERTIFICATIONS & SKILLS

- Certifications:** Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- AI/Machine Learning:** Python, TensorFlow, Keras, PyTorch, Scikit-learn, ONNX, Computer Vision (CNNs), NLP, RAG (ChromaDB, Sentence-Transformers), Grad-CAM, XAI, OOD Detection
- Tech Stack:** FastAPI, Django REST Framework, PostgreSQL, SQL, Docker, React (Vite), Next.js, Git

SOFT SKILLS

Analytical & Critical Thinking | Problem Solving | Research-Oriented | Attention to Detail | Collaboration & Communication
